CASEMET Cubo

Casemet at your service

Casemet is a professional in enclosures. Our product range is comprised of steel enclosures and accessories designed for demanding environments. In addition to standard enclosures, we offer customised enclosing solutions based on standard products, and totally tailor-made enclosing solutions based on the customer's product projects. Our service offering includes assembly services as well as the sourcing of third party components.

We are a reliable and flexible cooperation partner with solid experience in different enclosure solutions. Our strengths include good knowledge of various materials and an innovative design department.

Certificates and standards

We have modern production facilities. Our factories have received the following certificates:

- **ISO 9001:2015 Quality System Certificate**
- **ISO 14001:2015 Environmental Management System Certificate**

We are proud of our products. We develop and test them to suit a wide range of applications and to endure the most extreme conditions. Our Cubo E and EO and F enclosures are certified in accordance with EN 62208:2011. Cubo E and F enclosures are also certified in accordance with DNV-GL and UL 508A Industrial Control Panels.

STEEL ENCLOSURES

Casemet Cubo E wall cabinets, IP 66

Sizes 200 x 300 x 150 – 1000 x 1200 x 300 mm with plain sides or with flange openings	14
--	----

Casemet Cubo EO wall cabinets, IP 66

Sizes 190 x 240 x 138 – 480 x 960 x 248 mm flange knockouts	28
--	----

Casemet Cubo F terminal enclosures, IP 66

Sizes 150 x 150 x 80 – 800 x 400 x 120 mm with plain sides or with flange openings, some models with polycarbonate window	36
--	----

Common accessories for enclosures	48
---	----

Choosing an enclosure

When choosing a protective enclosure, it is necessary that you understand the operating principles of the equipment that will be installed in the enclosure, as well as the conditions in which the equipment will operate. With this information, the accurate identification of the required enclosure parameters is possible. Parameters to be considered include:

- material
- dimensions
- degree of protection and impact resistance
- flammability
- certificates
- special environments.

Material

Our Casemet Cubo series includes enclosures made of sheet steel (polyester painted mild steel and stainless steel, AISI304 or acid-proof steel AISI 316L) We use high quality materials provided to us by the world's leading suppliers. The right material ensures

the safety of the installed equipment and its users and eliminates the risk of unnecessary additional costs due to emergency breakdowns. The maintenance needs of an enclosure depend on the materials used.

Sheet steel

Steel enclosures have a high impact resistance and a high degree of protection. Steel enclosures can easily be made to customer-specific dimensions. The material thickness of our standard enclosures varies between 1.25 and 1.5 mm.

ordinary stainless steel is not recommended: for example, in the offshore industry It is a specially manufactured material and, as such, is more expensive than AISI304. The surface roughness of our enclosures made of this material is Ra 0,20...0,35 µm. These enclosures are available on request only.

Stainless steel, AISI304

Stainless steel, AISI304, is suitable for outdoor use (the use of a rain shelter is recommended) since it has excellent corrosion resistance and resistance to UV radiation. This material is suitable for demanding industrial environments - for example, in the food industry. Additionally, stainless steel is very practical as it needs scarcely any maintenance. Customising is, however, more difficult than with painted steel. The surface roughness of our enclosures made of stainless steel, AISI304, is Ra 0,20...0,35 µm.

Polyester painted mild steel

The standard colour of our polyester painted mild steel enclosures is grey (RAL 7035). The layer thickness is 80 – 120 µ, and it does not contain TGIC (triglycidyl isocyanurate).

Polyester painted Casemet Cubo enclosures undergo the following processes:

- pretreatment
- rinsing
- drying
- polyester-powder painting

Acid-proof steel, AISI316L

Acid-proof steel, AISI316L, is used for environments requiring extreme resistance to corrosion, or those where

Since any customer-specific cutouts are performed before surface treatment and painting, corrosion resistance remains high, even in the cutout areas.

Dimensions

The size of the enclosure is determined by the minimum and/or maximum dimensions of the application. When selecting the size, please consider whether further components are likely to be added at a later stage and, if so, whether the dimensions of the enclosure will still be adequate.

Degrees of protection provided by enclosures

Provided by enclosures, the degree of protection is an important factor. The degree of protection is defined for the enclosure and it should be maintained during the installation and assembly work. This means that, for instance, the IP class of the cable glands should be higher or the same as that of the enclosure.

IK code (European standard EN 62262)

IK code indicates the degree of protection provided by enclosures against external mechanical impact. The IK code for our steel enclosures ranges between IK 06 and IK 08. Further information is available on page 8.

IP code (European standard EN 60529)

The IP code consists of the letters IP followed by two digits and an optional letter. The first digit of the code classifies the degrees of protection provided against the intrusion of solid objects and dust. In turn, the second digit, stands for protection against liquids.

Casemet Cubo enclosures are designed for use in demanding environments. Their IP code ranges between IP 55 and IP 66/67. We have also made customer-specific solutions with an IP 69K rating. These applications are dust tight and able to withstand high-pressure and steam cleaning.

Flammability

Flammability is defined as how easily something will burn or ignite, causing fire or combustion. The flammability requirements of an enclosure depend on the application for which it is used. Flammability class refers to the classification of the ignition and burning resistance characteristics of materials other than metal or ceramic.

Further information is available in the table on page 9.

Nema-categories

National Electrical Manufacturers Association (NEMA)

NEMA is a commercial organization of electronic products in the United States. UL (Underwriters Laboratories) uses NEMA-defined standards and test methods to test the enclosures and issuing the UL certificate for the enclosures.

Nema-class	Description
NEMA1	Enclosures constructed for indoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt).
NEMA12	Enclosures constructed for indoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and circulating dust, lint, fibers, and flyings) and to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (dripping and light splashing)
NEMA13	Enclosures constructed for indoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and circulating dust, lint, fibers, and flyings); to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (dripping and light splashing); and to provide a degree of protection against the spraying, splashing, and seepage of oil and non-corrosive coolants.
NEMA3R	Enclosures constructed for outdoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt); to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (rain, sleet, snow); and that will be undamaged by the external formation of ice on the enclosure.
NEMA4	Enclosures constructed for indoor or outdoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and windblown dust); to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (rain, sleet, snow, splashing water, and hose directed water); and that will be undamaged by the external formation of ice on the enclosure.
NEMA4X	Enclosures constructed for indoor or outdoor to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (rain, sleet, snow, splashing water, and hose directed water); that provides an additional level of protection against corrosion; and that will be undamaged by the external formation of ice on the enclosure.

Casemet Cubo enclosures in more detail

Cover

Standard Casemet Cubo F terminal enclosures made of steel can be equipped with a polycarbonate window.

Gasket

We use injected, jointless PUR (polyurethane) gaskets in our steel enclosures to ensure a high protection class. An alternative gasket material is silicone.

The temperature resistance of various gasket materials is as follows:

- **Polyurethane** -40 – +80 °C
- **Neoprene** -40 – +100 °C
- **Silicone** -50 – +150 °C

Mounting plates

Our mounting plates are made of galvanized steel. The material thickness of the plates varies between 1.5 - 3.0 mm, depending on the size of the plate.

On request, the mounting plates are also available in customer-specific materials such as stainless steel or a non-conductive material. We custom-

ise mounting plates according to the customer's configurations, e.g. with threaded holes and cutouts.

Mounting plates are included as standard in our Casemet Cubo E and EO wall cabinets made of sheet steel.

Hinges

Our range of standard Casemet Cubo enclosures includes hinged wall cabinets in sheet steel. The position of the hinges can easily be changed from one side to the other in the case of Casemet Cubo E wall cabinets, even as the final operation at the installation site.

All of our enclosures can be hinged on request. Hinges can be found among our accessories.

Locking and sealing

The Casemet Cubo E and EO wall cabinets made of sheet steel contain locks as standard. Our range of accessories includes several different lock options.

THE CUSTOMIZED

Customer-specific enclosing solutions

We are experts in providing customer-specific enclosing solutions for demanding environments. Our customer-specific enclosing solutions offering can be divided into customised enclosing solutions based on standard products and totally tailor-made enclosing solutions based on the customer's product projects.

Customisation services

- Machining such as cutting, drilling and threading according to customer's drawings

- Printing

- Colour services

- Mechanical assembly

- Customer-specific sizes

Integration services

- Mechanical assembly

- Electromechanical assembly

- Hardware and software integrations

- Testing including e.g. environmental and functionality testing

- Sourcing of third party components

- Logistics & quality assurance

Our capabilities

We have years of experience with varying enclosing applications from one industry segment to another. In addition, we have highly skilled staff, an innovative design department and sound knowledge of various raw materials.

We specialize in solutions targeted at demanding environments requiring high degrees of protection. Special gasket and enclosure materials are available on request.

We have modern production facilities with the latest technology robots. The latest 2D-laser has recently been taken into use in our factory.

We use a fully automatic robotic cell for bending and welding our sheet steel enclosures. The bending cell is totally flexible for dimensioning without any tool changes. Our laser cutting technique enables freely customised shapes and main dimensions without setup times. Cutouts in metal enclosures are made before painting in order to prevent corrosion in the cutout areas.

Our strengths in producing customer-specific enclosing solutions:

- Experienced design department
- Knowledgeable and innovative personnel
- Experience of wide range of materials
- Large selection of high quality components
- Usage of laser cutting tools that enable freely customised shapes.

Casemet's latest and most modern 2D-laser

Salvagnini's 4kW L3-laser is Casemet's latest and most modern machinery investment. It provides high-speed and efficient cutting features of steel sheet.

Other main stations of the laser are: on and off-loading stations, disassembling and feeding stations, lifting tables, conveyor belt and Minitower stock.

Manipulated materials:

- Sheet steels
- Magnetic and non-magnetic surfaces
- Blank, painted or 1- or 2-sided surfaces, plastic filmed
- Pierced and embossed

Casemet Cubo E wall cabinets

IP 66, Models with two doors IP 55

Sizes 200 x 300 x 150 –
1000 x 1200 x 300 mm

- Polyester painted mild steel: Plain sides and models with flange openings
- Stainless steel AISI304: Plain sides
- Acid-proof steel AISI316L: Plain sides

Casemet Cubo E wall cabinets in brief:

- The models of polyester painted enclosures have flange openings, while stainless and acid-proof steel models have plain sides
- Available in 31 sizes
- Has welded M8 bolts for a mounting plate in the bottom of the base and M6 bolts for DIN rail profiles or DIN rails in the door
- Has M6 bolts for earthing on two sides of the base
- The door can be opened 110°
- The door can easily be changed from right to left-hand hinged
- Customer-specific dimensionings also available in small volumes at competitive prices
- Polyester painted enclosures with wall mounting holes. Stainless and acid-proof steel versions with drill marks only.

Contents of the product package:

- Enclosure base and door
- Cover plate(s) for flange opening(s), bolts and nuts (polyester painted enclosures)
- Mounting plate with required nuts
- M8 bolt, washers and a nut for earth connection of the mounting plate
- Earth marks
- DIN 3 lock and one DIN 3 key
- Cover plugs for mounting holes (polyester painted enclosures) and hinge holes
- Nut and washers for M6 bolts

Customising services available for this product:

- Customer-specific dimensions
- Machining
- Colour service
- Assembly of components

Further information on our customising services is available on page 12.

Conformity

Steel enclosures:

Technical information

Degree of protection: IP 66, Models with two doors IP 55

Impact resistance: IK 09 (-25 °C... +35 °C)

Material

Base/door: Polyester painted mild steel, stainless steel AISI304 or acid-proof steel AISI316L

Gasket: PUR (polyurethane)

Mounting plate: Galvanised steel

Locks: Chrome plated zinc die in painted enclosures, AISI304 or AISI316L in stainless steel enclosures

Hinges: Stainless steel

Knockout alternatives

Polyester painted enclosures: Flange openings, Plain sides

Enclosures made of acid-proof steel: Plain sides

Enclosures made of stainless steel: Plain sides

Standard colour

Polyester painted enclosures: Grey RAL7035

Material based technical information available on page 5.

A rain shelter is recommended if a cabinet is used outdoors

The enclosure has welded M8 bolts in the bottom of the base and M6 bolts in the door. There is also an M6 bolt for earthing on one side.

Casemet Cubo EO wall cabinets

IP 66

Sizes 190 x 240 x 138
– 480 x 960 x 248 mm

Casemet Cubo EO wall cabinets in brief:

- Has flange knockouts on each side of the base
- Available in 22 sizes
- Door fitted with a quarter-turn slotted fastener
- The door can be opened 110°
- Has fixed M8 inserts for a mounting plate in the bottom of the base
- Has M6 bolt for earthing on one side of the base and two M6 bolts in the door, for earthing
- Excellent choice for creating larger assemblies.

Contents of the product package:

- Enclosure base
- Door
- M8 mounting screws and earthing accessories
- Slotted lock

Customising services available for this product:

- Machining
- Prints
- Colour service
- Assembly of components

Further information on our customising services is available on page 12.

The enclosures include flange knockouts on all four sides.

Conformity	
Steel enclosures:	CE RoHS (E)
Technical information	
Degree of protection:	IP 66
Impact resistance:	IK 09 (-25 °C... +35 °C)
Material	
Base/door:	Polyester painted mild steel
Gasket:	PUR (polyurethane)
Mounting plate:	Galvanised steel
Knockout alternatives	
Polyester painted mild steel cabinets:	Flange knockouts
Standard colour	
Polyester painted mild steel cabinets:	Grey RAL7035

Material based technical information available on page 5.

Casemet Cubo F terminal enclosures

IP 66

Sizes 150 x 150 x 80
– 800 x 400 x 120 mm

Casemet Cubo F terminal enclosure in brief:

- Has plain sides
- 120 mm deep polyester painted enclosures are also available with flange openings or polycarbonate window as standard
- Available in 30 sizes and in two base depth alternatives
- Small push button enclosures also available in four sizes
- Include a perforated support for DIN rail or mounting plate enabling the maximum use of all sides of the enclosure for cable entries
- Has M6 bolt for earthing on one side of the base
- Customer-specific dimensionings also available in small volumes at competitive prices
- All versions can be supplied with hinges
- Polyester painted enclosures with wall mounting holes. Stainless and acid-proof steel versions with drill marks only.

Contents of the product package:

- Enclosure base
- Cover
- Cover screws with gaskets and cage nuts
- Cover plugs for mounting holes
- A M6 nut and a washer for earthing
- Earth marks
- Models with flange openings include also cover plates, bolts and washers

Customising services available for this product:

- Customer-specific dimensions
- Machining
- Colour service
- Assembly of components

Further information on our customising services is available on page 12.

Conformity	
Steel enclosures:	CE RoHS (F) U DNV-GL
Technical information	
Degree of protection:	IP66 IP65, with two cover screws
Impact resistance:	IK 09 (-25 °C... +35 °C), models with window IK 07 (-5 °C...+80 °C)
Material	
Base/cover:	Polyester painted mild steel, stainless steel AISI304 or acid-proof steel AISI316L
Gasket:	PUR (polyurethane)
Cover screw gasket:	Dryflex (SEBS)
Knockout alternatives	
Polyester painted enclosures:	Plain sides, flange openings
Enclosures made of stainless steel:	Plain sides
Enclosures made of acid-proof steel:	Plain sides
Standard colour	
Polyester painted enclosures:	Grey RAL7035

Material based technical information available on page 5.

These enclosures include a perforated support for a DIN rail or mounting plate as standard. The optimised mounting supports enable the maximum use of all sides of the enclosure for cable entries.

120 mm deep polyester painted enclosures are also available with flange openings. The product package includes cover plates, bolts and washers.

Product information can be found at www.casemet.fi.
