## Strong as steel.

**Casemet** is a Finnish family-owned company whose main products are steel enclosure solutions. In addition, we offer contract manufacturing of sheet metal structures and electromechanics.

Our operations are based on flexible and customer-oriented service, high-quality and reliable manufacturing, a high level of product finishing and delivery reliability. All our activities are guided by the company's values:

### **Partnership:**

Our co-operation with customers, staff and other stakeholders is based on mutual trust and respect.

### **Excellence:**

Our expertise is strong and we are constantly developing our products and operations to be even higher quality and more environmentally friendly.

### **Growth:**

Our modern production technology, motivated personnel and responsible partners create the basis for sustainable growth.

More information about us and our products can be found at [www.casemet.fi/home](http://www.casemet.fi/home)

# Casemet Oy

**Casemet's** core expertise includes steel enclosure solutions and contract manufacturing of electromechanical and sheet metal structures. Our strength is the design and manufacture of customer-specific enclosure solutions for demanding operating conditions and environments, where, for example, electrical mechanics must be protected according to the needs of industrial use.

**Our factories** are located in Mikkeli and Pärnu. The production of the Mikkeli plant focuses on the manufacture of metal enclosures and the contract manufacturing of sheet metal structures and electromechanics. The Pärnu factory, on the other hand, specialises in the manufacturing of mechanical parts as a subcontractor for companies in the electronics and mechanical engineering industries. The machinery of our factories enables versatile and demanding metal work.

## Certificates and standards

Our operations are guided by certified management systems: quality system ISO9001:2015 and environmental management system ISO14001:2015.

"  
**Strong expertise in Finland and Estonia.**

# Products and services

## ENCLOSING SOLUTIONS

- Standard enclosures
- Standard cabinets
- Customized enclosures and cabinets

## SHEET METAL CONTRACT MANUFACTURING

- Sheet metal parts, -products and structures
- Several material strengths and raw materials

## ELECTROMECHANICAL CONTRACT MANUFACTURING

- Manufacture and assembly of electrical equipment with over 45 years of experience

## We are proud of our products

We are constantly developing and testing our products to suit a wide range of applications and to withstand even the most extreme conditions. Our Cubo E, EO, F and U -standard enclosure series have been admitted with the EN 62208:2011 certificate. Cubo V enclosure series has been admitted with the IEC 60529 certificate. Also our Cubo E and F enclosure series have been admitted with the DNG-GL and UL 508A Industrial Control Panels certificates.

# Enclosing solutions

## Standard enclosures

Casemet's products include a wide range of different sizes, steel made, standard enclosures. Enclosures are developed to withstand demanding operating conditions and environments. With our comprehensive range of enclosures accessories we are able to insure that even the more spesific customer needs are met.

Read more about Casemet Cubo -series' standard enclosures from page 12.

.....

## Standard cabinets

We have expanded our product family with new product group - standard cabinets. These classified standard cabinets are suitable for both out- and indoor use. Like standard enclosures, cabinets are designed for demanding industrial applications and environments. Ask more about our standard cabinets from our sales team!

.....

## Customized enclosures and cabinets

We also implement customer-specific, customized enclosure solutions. Customization is based on our standard products, which can be modified, for example:

- Machining (millings and openings, threading, bending and cutting)
- Printing (labels, stickers and various printing opportunities)
- Painting (various color possibilities and surface structure)
- Mechanical assembly (components)
- Customer spesific sizes (size based on customer's required dimensions)

We also manufacture **tailor-made enclosing solutions** as to the specifications and requirements set by the customer.

.....

# Customized enclosing solutions

Machining such as cutting, drilling and threading according to customer's drawings.

Customer-specific components

Mechanical assembly

Customer-specific sizes

Electromechanical assembly

Testing

"  
**To the  
customer's  
needs as  
a custom  
order.**

# Selecting an enclosure

When choosing an enclosure, it is necessary to understand the operating principles of the equipment that will be installed in the enclosure, as well as the conditions in which the equipment will operate. With this information, the accurate identification of the required enclosure parameters is possible.

Parameters to be considered include:

- **material**
- **dimensions**
- **degree of protection and impact resistance**
- **demands set by the operating environment**
- **special environments**

## Material

Our Casemet Cubo series includes enclosures made of sheet steel (polyester painted mild steel and stainless steel, AISI304 or AISI316L).

The right material ensures the safety of the installed equipment

and its users and eliminates the risk of unnecessary additional costs due to emergency breakdowns. The maintenance needs of an enclosure depend on the materials used.

### Sheet steel

Steel enclosures have a high impact resistance and a high degree of protection. Steel enclosures can easily be made to customer-specific dimensions. The material thickness of our standard enclosures varies between 1.25 and 1.5 mm (Cubo OC materials between 2.0 and 3.0 mm).

### Stainless steel, AISI304

Stainless steel, AISI304, is suitable for outdoor use (the use of a rain shelter is recommended) since it has excellent corrosion resistance and resistance to UV radiation. This material is suitable for demanding industrial environments - for example, in the food industry. The surface roughness of our enclosures made of stainless steel, AISI304, is Ra 0,20...0,35 µm.

### Stainless steel, AISI316L

Stainless steel AISI316L, is used for environments requiring extreme resistance to corrosion, or those where ordinary stainless steel is not recommended: for example, in the offshore industry. The surface roughness of our enclosures made of AISI316L is Ra 0,20...0,35 µm.

### Polyester painted mild steel

The standard colour of our polyester painted mild steel enclosures is grey (RAL 7035). The layer thickness is 80 – 120 µ, and it does not contain TGIC (triglycidyl isocyanurate).

## Aluminum

The use of aluminum in an enclosure solution as a material provides excellent corrosion resistance. Aluminum enclosure is also light in weight. Ask for more information!

Fair \*\*  
Poor \*

## Dimensions

The size of the enclosure is determined by the minimum and/or maximum dimensions of the application. When selecting the size, please consider whether further components are likely to be added at a later stage and, if so, whether

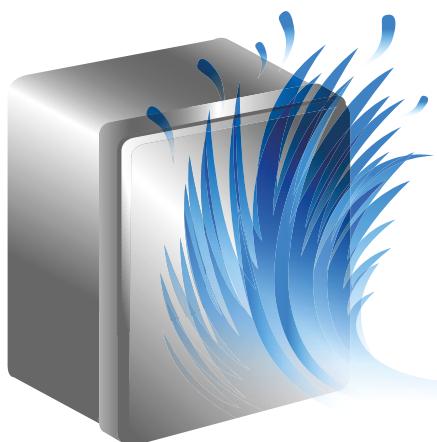

the dimensions of the enclosure will still be adequate.

Our standard enclosures are available in several different sizes and we can create solutions according to the customer's desired dimensions.

# Degree of protection provided by an enclosure

The degree of the enclosure's protection consists of the IP and IK codes. The degree of protection is defined for an empty enclosure and it should be maintained during the installation and assembly work. This means that, for instance, the IP class of the cable glands should be higher or the same as that of the enclosure.

## IP code (European standard EN 60529)

The IP code consists of the letters IP followed by two digits and an optional letter. The first digit of the code classifies the degrees of protection provided against the intrusion of solid objects and dust. In turn, the second digit, stands for protection against liquids.

Casemet Cubo enclosures are designed for use in demanding environments. Their IP code ranges between IP 55 and IP 66/67/68/69. We have also made customer-specific solutions with an IP 69K rating. These applications are dust tight and able to withstand highpressure and steam cleaning.

## IK code (European standard EN 62262)

IK code indicates the degree of protection provided by enclosures against external mechanical impact. The IK code for our steel enclosures is IK 09 or IK 10.

# Casemet Cubo - standard enclosure series

## Cover

Standard Casemet Cubo F terminal enclosures made of steel can be equipped with a polycarbonate window.

## Gasket

We use injected, jointless PUR (polyurethane) or silicone gaskets in our steel enclosures to ensure a high protection class.

The temperature resistance of various gasket materials is as follows:

<b>Polyurethane</b>	<b>-40 – +80 °C</b>
<b>Silicone</b>	<b>-50 – +150 °C</b>

## Mounting plates

Our mounting plates are made of galvanized steel. The material thickness of the plates varies between 1.5 - 3.0 mm, depending on the size of the plate.

We also manufacture mounting plates in customer-specific materials such as stainless steel or a non-conductive material. We customise mounting plates according to the customer's configurations, e.g. with threaded holes and cutouts. Mounting plates are included as standard in our Casemet Cubo E, EO, V and U wall cabinets made of sheet steel.

## Hinges

Our range of standard Casemet Cubo enclosures includes hinged wall cabinets in sheet steel. The position of the hinges can easily be changed from one side to the other in Casemet's Cubo E wall cabinets, even as the final operation at the installation site.

All of our enclosures can be equipped with hinges (except Cubo V). Hinges are a part of our range of enclosure accessories.

## Locking

The Casemet Cubo E and EO wall cabinets made of sheet steel contain locks as standard. Our range of accessories includes several different lock options.

## National Electrical Manufacturers Association (NEMA)

NEMA is a commercial organization of electronic products in the United States. UL (Underwriters Laboratories) uses NEMA-defined standards and test methods to test the enclosures and issuing the UL certificate for the enclosures.

NEMA-class	Description
NEMA 1	Enclosures constructed for indoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt).
NEMA 12	Enclosures constructed for indoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and circulating dust, lint, fibers, and flyings) and to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (dripping and light splashing).
NEMA 13	Enclosures constructed for indoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and circulating dust, lint, fibers, and flyings); to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (dripping and light splashing); and to provide a degree of protection against the spraying, splashing, and seepage of oil and non-corrosive coolants.
NEMA 3R	Enclosures constructed for outdoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt); to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (rain, sleet, snow); and that will be undamaged by the external formation of ice on the enclosure.
NEMA 4	Enclosures constructed for indoor or outdoor to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and windblown dust); to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (rain, sleet, snow, splashing water, and hose directed water); and that will be undamaged by the external formation of ice on the enclosure.
NEMA 4X	Enclosures constructed for indoor or outdoor to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (rain, sleet, snow, splashing water, and hose directed water); that provides an additional level of protection against corrosion; and that will be undamaged by the external formation of ice on the enclosure.

# Casemet Cubo E wall cabinets

## IP 66, models with two doors IP 55

**Sizes 200 x 300 x 150 –  
1000 x 1200 x 300 mm**

- Polyester painted mild steel: Plain sides and models with flange openings
- Stainless steel AISI304: Plain sides
- Stainless steel AISI316L: Plain sides

### Casemet Cubo E wall cabinets in brief:

- The models of polyester painted enclosures have flange openings, while stainless steel models have plain sides
- Available in 40 sizes
- Has welded M8 bolts for a mounting plate in the bottom of the base and M6 bolts for DIN rail profiles or DIN rails in the door
- Has M6 bolts for earthing on two sides of the base
- The door can be opened 110°
- The door can easily be changed from right to left-hand hinged
- Customer-specific dimensionings also available in small volumes
- Polyester painted enclosures with wall mounting holes
- Stainless steel versions have drill marks ready

### Contents of the product package:

- Enclosure base and door
- Cover plate(s) for flange opening(s), bolts and nuts (polyester painted enclosures)
- Mounting plate with required nuts
- M8 bolt, washers and a nut for earth connection of the mounting plate
- Earth marks
- DIN 3 lock and one DIN 3 key
- Cover plugs for mounting holes (polyester painted enclosures) and hinge holes
- Nut and washers for M6 bolts

#### Conformity

## Other accessories

Product code	Description	Dimensions (mm)	Package size (pcs)
ED10	Triangular lock with 11 mm key	Ø 28 x 32 x Ø 22	1
ED10M6	Lock with wing handle, width 50 mm	50 x 45 x Ø 22	1
EKL1	Lock incl. 2 keys	Ø 27 x 33 x Ø 22	1
EH1	Black swing handle for three point locking	48 x 180 x 50	1
EDS2	Door stopper, set, stainless steel	-	1
EG200	Door grounding, M6>M6, 2,5 mm <sup>2</sup>	Length 220 mm	1
EFLM4	Counter part for fastening lugs, set of 4 pcs	-	1
OLT42KEY	DIN 3 key for standard lock	50 x 53 x Ø22	1
VPT595	Door stopper	255 x 40 x 35	1
E07140	Adapter for padlock	50 x 45 x 35	1
EFFL3.20	Fastening lugs, 20 mm high, set of 4 pcs, galvanized steel	45 x 60 x 25	1
EFFL3.22	Fastening lugs, 20 mm high, set of 4 pcs, AISI 316L	45 x 60 x 25	1
VPTL100	Lock with solid T-handle, padlock	50 x 48 x Ø22	1
VPTL116	T-handle, not lockable	78 x 65 x Ø22	1
VPTL198	Black swing handle for three point locking, 2 keys	165 x 36 x 42	1
VPTL196	Hygiene lock, IP66, material AISI 316L	Ø28 x 41 x Ø22	1
VPTL197	Hygiene lock key	50 x 53 x Ø18	1

Triangular lock with 11 mm key,  
ED10.

Lock with wing handle, ED10M6.

Lock incl. 2 keys, EKL1.

Black swing handle for three point  
locking, EH1.

Door stopper, set , EDS2.

Door grounding, EG200.

Counter part for fastening lugs,  
EFLM4.

DIN 3 key for standard lock,  
OLT42KEY.

Adapter for padlock, E07104.

EFFL3.22 Fastening lugs, 20 mm high,  
set of 4 pcs, AISI 316L.

VPTL100 Lock with solid T-handle,  
padlock, VPTL100.

T-handle, not lockable VPTL116.

Hygiene lock VPTL196 and  
a key VPTL197.

Black swing handle for three point locking  
and 2 keys VPTL198.

# Casemet Cubo EO wall cabinets

**IP 66**

**Sizes 190 x 240 x 138 – 480 x 960 x 248 mm**

- Polyester painted mild steel: flange knockouts

## **Casemet Cubo EO wall cabinets in brief:**

- Has flange knockouts on each side of the base
- Available in 22 sizes
- Door fitted with a quarter-turn slotted fastener
- The door can be opened 110°
- Has fixed M8 inserts for a mounting plate in the bottom of the base
- Has M6 bolt for earthing on one side of the base and two M6 bolts in the door, for earthing
- Excellent choice for creating larger assemblies

## **Contents of the product package:**

- Enclosure base
- Door
- M8 mounting screws and earthing accessories
- Slotted lock

### **Conformity**

Steel enclosures:

### **Technical information**

Degree of protection: IP 66

Impact resistance: IK 09 (-25 °C... +35 °C)

### **Material**

Base/door: Polyester painted mild steel

Gasket: PUR (polyurethane)

Mounting plate: Galvanized steel

### **Knockout alternatives**

Polyester painted mild steel

cabinets: Flange knockouts

### **Standard colour**

Polyester painted mild steel

cabinets: Grey RAL7035

Material based technical information available on page 9.

The enclosures include flange knockouts on all four sides.

Product information can be found at [www.casemet.fi](http://www.casemet.fi)

# Casemet Cubo F terminal enclosures

## IP 66

**Sizes 150 x 150 x 80 – 800 x 400 x 120 mm**

- Polyester painted mild steel: plain sides and flange openings
- Stainless steel AISI 304: plain sides
- Stainless steel AISI 316L: plain sides

### Casemet Cubo F terminal enclosure in brief:

- Has plain sides
- 120 mm deep polyester painted enclosures are also available with flange openings or polycarbonate window as standard
- Available in 30 sizes and in two base depth alternatives
- Small push button enclosures also available in four sizes
- Include a perforated support for DIN rail or mounting plate enabling the maximum use of all sides of the enclosure for cable entries
- Has M6 bolt for earthing on one side of the base
- Customer-specific dimensionings also available in small volumes
- All versions can be supplied with hinges
- Polyester painted enclosures with wall mounting holes
- Stainless and acid-proof steel versions have drill marks ready

### Contents of the product package:

- Enclosure base
- Cover
- Cover screws with gaskets and cage nuts
- Cover plugs for mounting holes
- A M6 nut and a washer for earthing
- Earth marks
- Models with flange openings include also cover plates, bolts and washers

### Conformity

Steel enclosures:

### Technical information

Degree of protection:

IP 66, models with two cover screws IP 55

Impact resistance:

IK 09 (-25 °C... +35 °C),  
models with window IK 07  
(-5 °C...+80 °C)

### Material

Base/cover:

Polyester painted mild steel,  
stainless steel AISI304 or  
acid-proof steel AISI316L

Gasket:

PUR (polyurethane)  
Dryflex (SEBS)

### Knockout alternatives

Polyester painted enclosures:

Plain sides, flange openings

Enclosures made of stainless steel: (AISI 304):

Plain sides

Enclosures made of acid-proof steel: (AISI 316L):

Plain sides

### Standard colour

Polyester painted enclosures:

Grey RAL 7035

Material based technical information available on page 9.

These enclosures include a perforated support for a DIN rail or mounting plate as standard. The optimised mounting supports enable the maximum use of all sides of the enclosure for cable entries.

120 mm deep polyester painted enclosures are also available with flange openings. The product package includes cover plates, bolts and washers.

# Casemet Cubo V wall cabinets

"  
**This  
enclosure  
does not fear  
water or dust.**

Cubo V-Series enclosures are dust-tight and resistant to water and steam sprayed close by, as well as immersion.

The enclosures are available in polyester and stainless steel and have a high quality seamless silicone seal. Smooth sides in all enclosures.

The enclosures are supplied with welded fastening ears. Fastening the lid with screws outside the sealing surface. The bottom and folders have welding bolts ready.

- IP 69 tested and approved
- High heat resistance
- High vibration resistance due to welded fastening lugs

## Conformity

Steel enclosures:

## Technical information

Degree of protection: IP 66, IP 68, IP 69

## Material

Base/cover: Polyester painted mild steel, stainless steel AISI304

Gasket: Silicone

Mounting plate: Galvanized steel
